

COVID-19 Guidelines

Summer 2022

Safety is always the number one priority at Southern District YMCA Camp Lincoln. These guidelines are based on the most up-to-date information from the Center for Disease Control (CDC), state & local health agencies, and industry standards. These guidelines are a living document and will be updated accordingly.

General Guidelines

- All staff are required to be fully vaccinated to work summer camp.
- If a staff or camper tests positive for COVID-19, they must notify the Camp Director to confirm the proper necessary steps. No camper or staff who tests positive for COVID-19 may attend camp without completing the necessary quarantining and testing procedures below.
- If staff have a religious or medical exemption, the proper documentation must be completed and approved by the Camp Director and/Director of Operations before your attending work.
- Staff must be vaccinated to staff any overnight programming.
- Campers are not required to be vaccinated. If campers are eligible, we highly recommend they be vaccinated against COVID-19.

Masking

- Masks are not required for vaccinated or unvaccinated staff and campers in any setting.
- Any who chooses to wear a mask at any time will be supported in their decision.

Known Exposure Response

Southern District YMCA Camp Lincoln is not conducting on-site screening testing or case tracing known exposure between staff or campers. It is the responsibility of staff and camper families to dutifully report known COVID-19 exposure to Camp Director to assist in the overall health of our community. If you have knowingly been exposed to COVID-19:

Vaccinated

- You may continue to attend camp provided you have no symptoms.
- If you develop symptoms, you must quarantine for 5-days. You may return to camp following your quarantine.
- If you test positive, you must quarantine for 5-days before returning to camp and be symptom free.

Unvaccinated

- You may continue to attend camp provided you have no symptoms.
- If you develop symptoms, you must quarantine for 5-days and test. Test should be administered at-least 5-days following known exposure.
- If test is negative, you may return to camp following your 5-day quarantine provided you have no symptoms.

-
- If you test positive, you must quarantine for 5-days before returning to camp and be symptom free

Positive Case in Past 90-Days

- Whether you are vaccinated or unvaccinated, you do not need to test unless you develop symptoms.
